

SIDING INSTALLATION APPARATUSES AND METHODS FOR INSTALLING  
SIDING PIECES ON WALLS

ABSTRACT OF THE DISCLOSURE

Siding installation apparatuses and methods for engaging a first siding piece and supporting a second siding piece are disclosed herein. In one embodiment, the apparatus includes a support member having a support surface to support the second siding piece, an engagement member projecting from the support member, and a securing assembly coupled to the support member to releasably restrict the support member from moving relative to the first siding piece. The engagement member is configured to engage the bottom portion of the first siding piece by contacting the back surface. It is emphasized that this Abstract is provided to comply with the rules requiring an abstract. It is submitted with the understanding that it will not be used to interpret or limit the scope or meaning of the claims. 37 C.F.R. § 1.72(b).
